Response to Amendment

Applicants' amendment filed on March 17, 2005 has been entered and forwarded to the examiner on March 28, 2005.

Therefore claims 1-3 as amended by the amendment and claims 4-9 as previously recited and claims 10-12 as presently newly added are currently pending in the Application.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

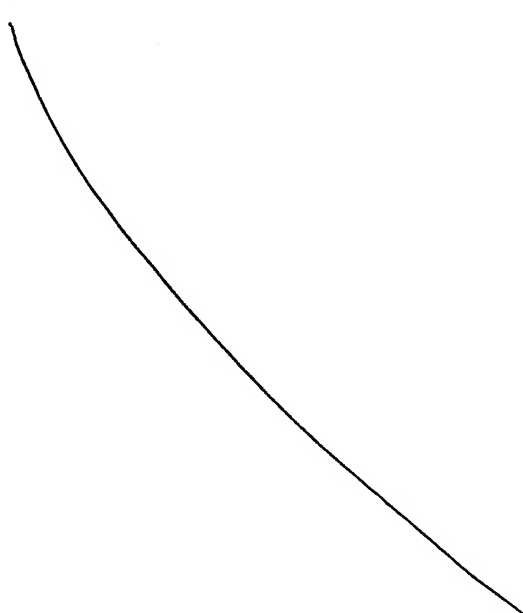

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The applied prior art fails to teach a combination of all the claimed features as presented in independent claims, which include an electronic control device as claimed in independent claim 1 namely in an electronic control device having a power supply circuit formed on a multi-layered substrate for adjusting a power supply voltage supplied by an external power supply to a desired level, the power supply circuit including a switching component to which the power supply voltage is applied at an input terminal thereof and which is driven by a duty signal including an output voltage forming circuit formed in a top layer of the multi-layered substrate for producing an output voltage formed from a voltage inputted from the switching device; a ground wiring pattern that defines a ground electrical potential of the output voltage forming circuit; a common ground wiring pattern that defines a ground electrical

potential of each of electronic circuits included in the electronic control devices except for the output voltage forming a circuit, and a connecting part that connects the ground wiring pattern with the common ground wiring pattern, wherein the ground wiring pattern is formed in a layer of the multi-layered substrate and connected to the output voltage forming circuit, and the common ground wiring pattern is formed in a layer of the multi-layered substrate, and especially the prior art of record does not disclose ground wires being formed in the layer of the multilayer substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
